Even the brightest business owners need a smart point of sale

However, smart POS technology that is scalable is often out of reach for businesses because it isn't affordable.

Smaller businesses are not served well by current POS offerings

- Current POS system don’t meet the unique needs of simpler businesses
- Many POS solutions are designed for complex businesses
- POS systems designed for complex businesses are expensive and complicated to use
- Smaller businesses demand 24/7/365 tech support, and owners often need advice on how to run a business as their business grows
- Installation of a new POS system can often result in ill-afforded business disruptions

Introducing

a new suite of cloud-based POS solutions where being “smart” runs in the family
