

Restaurants give us an opportunity to branch out or settle in — to shake off the stresses of today and share a connection over great food. The way service looks has changed this year, but we have recommendations to keep your customers cared for and your business booming.

The Restaurant Collection Includes:

Point of Sale Our cloud-based POS solutions have smooth-as-butter integrations with online ordering, contactless payments and more. Manage from work, home, or wherever life takes you.

Online Ordering Make the transition with a simple, reliable solution delivering the revenue you need and the efficient, cleanly designed checkout experience customers expect.

Mobile Payments Designed for dependability, you can accept payments online or in-person payments from your phone or tablet in minutes. Curbside pickup just became a breeze.

Email Marketing Keep your customers close even during social distancing. Provide key information and updates about your hours, current specials, takeout, delivery options and more.

Payroll Everything in the restaurant industry is fast paced, including your payroll and HR needs. With our tools, you'll spend less time worrying about employee onboarding or payroll and more time building memorable customer experiences.

Virtual Gift
Ditch physical gift cards for the convenience of selling virtual gift cards on your website. Ideal for customers wanting to show their support, or just looking for a delicious meal.

Make Your Comeback
